

on Heating & Cooling

Dominic Muto

Let me begin by saying how truly excited I am that the Experts has finally launched! It's been a work in process but we are here and looking forward to many more editions. Please allow me to introduce myself, my name is Dominic Muto and along with my wife, Divina Muto, we are the proud owners of Spring's Servicing & Heating Ltd in Calgary. I would like to take this opportunity to tell you a bit about myself and the company.

I am a certified sheet metal journeyman and certified gasfitter with over 25 years experience. I began working in the trade in British Columbia for a small heating company that specialized in new home construction. I learned a great deal from my old boss R.A. Buzza and became diversified in all facets of the HVAC industry. In 1997 I moved to Calgary where I met my now wife Divina. I worked for a heating company here in town for about a year when I realized that I wanted more than just a job. So I decided to start up my own heating company. Easier said than done! Start up costs, hiring employees, finding a location and establishing a reputation seemed impossible until one day I stumbled upon a

classified ad that read "Established Heating Company for Sale". I thought, what do I have to lose, let's call. It is hard to believe that one phone call would change my life forever. I spoke to Dorothy Spring over the phone and told her I saw the ad in the paper and was interested in getting more information. She was more than accommodating and within days we set up a meeting.

Spring's Heating was established in 1971 and was started by a husband and wife team Steve and Dorothy Spring. Steve and Dorothy worked extremely hard to build a reputable, well established company over the years and in 1998 Spring's Heating was bought by Divina and I who have continued to maintain high quality

service. We owe a great deal of gratitude to Steve and Dorothy, they have given us more than just a heating company they have provided our family with a bright future and an ongoing friendship.

Spring's Heating specializes in furnace repair and installation. We are a service oriented company specializing in Carrier products. We pride ourselves on customer service and strive to provide our customers with piece of mind knowing that the heating company they chose to install the new furnace can also maintain and service what they sell. So many heating companies today are simply looking for the sale and are never to be found again. This is not the case

with our company; we want you to call us for all your heating and cooling needs.

We also have knowledgeable, reliable employees who have been with our company for 7 years. Scott Johnston is our main installer who is also a sheet metal journeyman with 15 years experience in the industry. Along with Mohan Badwal who is a journeyman gas fitter with 10 years experience. Dave Farley is our duct cleaner and has been with our company for 3 years. Our team maintains high standards and has great pride of workmanship. Our men are very conscientious and respectful of their work environment. Our team's focus is on customer satisfaction and paying attention to detail.

Spring's Servicing & Heating is sure to provide our customers with experience, knowledge and friendly service. Why not make Spring's part of your family?
